

World Forum on Access to Land and Natural Resources

Working Programme

Axis 1 - 10 years after

Land reconcentration and exclusion: Evaluating contemporary evolutions in land access and use 10 years after the CIRADR in Porto Alegre (2006)

1.1. Land reconcentration	1.2. Evictions, exclusions and struggles
<ul style="list-style-type: none"> • Agricultural land grabbing/ concentration: a quantitative assessment • The rush for our forests • Resource grabbing: water and fisheries; • Case studies • Testimonials • Commentary and analysis 	<ul style="list-style-type: none"> • Eviction/marginalization • Rural poverty, urban poverty: rural exodus and exclusion • Assessing existing forms of resistance to processes of resource monopolization • Case studies • Testimonials • Commentary and analysis

Axis 2 – current situation

Land and natural resource access and production models: feeding ourselves from the earth, creating jobs and income for a maximum number of people, protecting the environment...

2.1. Improving the distribution of land and natural resource access: Producing more wealth, distributing resources more effectively, and creating more jobs	2.2. Improving the distribution of land and natural resource access: Conserving resources and protecting the earth
<ul style="list-style-type: none"> • Family farming or large-scale farming business?: a new look at the economic efficacy of production models • Decent livelihood activities for all • Access to land and natural resources is not enough. Access to production means should go together • Resource grabbing and the distribution of wealth (AV) • Sharing access to resources, a need for food sovereignty? • Case Studies 	<p>Repartition of resources, production models, and impacts on the environment: soils and biodiversity erosion, pollutions, climate change</p> <p>Deforestation and agricultural frontiers: conservation, sustainable development, and investor concessions ...</p> <p>Water access and use (irrigation, fishing areas): distribution and sustainable use</p> <p>Sharing access to land and natural resources, a need for Agroecological revolution?</p> <p>Case studies</p> <p>Testimonials</p>

<ul style="list-style-type: none"> • Testimonials • Commentary and analysis 	<p>Commentary and analysis</p>
---	--------------------------------

Axis 3: Experiences, policies and proposals for the future.

Which access to land and natural resources policies and which agricultural policies will result in generalizing production models which generates jobs and added value without destroying natural resources?

<p>3.1. Facilitating land and natural resource access amongst vulnerable populations: Policies and proposals</p>	<p>3.3. Ending evictions and protecting populations' rights: Policies and proposals</p>
<ul style="list-style-type: none"> • Land reform or agrarian reform? • Regulating land markets (purchase, sale, and rental), fiscal policy • Access to capital: a necessary prerequisite • Concrete experiences • Testimonials and proposals 	<p>How to best implement the voluntary guidelines on the ground?</p> <p>Protecting vulnerable populations (poor farmers, minorities...) and ending evictions; building alliances on the ground</p> <p>International governance: is it conceivable? Including resource access rights for the poor in the MDGs?</p> <p>Concrete experiences</p> <p>Testimonials and proposals</p>
